MEMORANDUM

04/09/99

TO: Dick Vesperman
FROM: Jim Cannon

Dear Mr. Vesperman,

John Lyons has asked that we send a copy of the sampling and analysis plan for maintenance dredging at "A" and "B" berths to you for your inspection and comment. The material we wish to dredge is located at the face of "A", just outside of the location of the silt curtain, and along the face of "B".

The material is to go to the upland site at the end of Canal St. in Richmond. Dr. Jack Greg of the RWQCB chose the testing locations. Norman Chan of the Port of Richmond has required that we also test for asbestos in the material for placement at Canal St.

Please forward any questions or comments to me at the above address.

I look forward to hearing from you about this project.

Best regards,

Jim Cannon
